

- For all air conditioning and refrigeration condensate drain pan applications
- Keeps condensate drain pan lines clean and free-flowing
- Prevents sludge build-up and odors
- Time release formula, 4-6 month service life
- Metal & plastic safe
- Adheres to drain pan; will not float or move

Condensate Drain Pan Treatment

PurCool® Green

Description

PurCool Green strips and tablets prevent sludge build-up in air conditioning and refrigeration condensate drain pans. They utilize unique, environmentally friendly plant-based suspending and dispersing action to prevent build-ups, overflows, and odors in drain pans. When placed in the drain pan, PurCool Green will slowly dissolve in the condensate water, providing preventative treatment for 4-6 months. PurCool Green does not contain any harsh chemicals or biocides, making them safer for the user and the environment.

Application

Use in all A/C air handlers, fan coil units, window units, mini splits, and refrigeration condensate drain pans.

Packaging

	Nu-Calgon #	ClenAir #
Mini Strip	61044	PCG5MS
10 Ton Commercial Strip	61045	PCG10T
30 Ton Commercial Strip	61046	PCG30T
Green 3 Ton Tablet	61048	
Green 3 Ton Bulk (200)	61049	
Green 5 Ton Tablet	61051	PCG5T
Green 5 Ton Bulk (100)	61052	PCG5T-100

Installation

Place the PurCool Green strip or tablet in the condensate drain pan away from the drain opening. When drain pan begins to collect condensate water, the PurCool Green strip or tablet will adhere to the pan, begin to slowly dissolve and provide treatment. PurCool Green will not float or move in the drain pan, and over time, the PurCool Green will completely dissolve. When the product is no longer visible, it is time to replace the strip or tablet. Wait a minimum of five minutes before equipment start-up.

Mini Split Installation

PurCool Green Mini Strips were designed to fit into the tight fit drain pans of Mini Split air conditioning air handlers and other tight fit applications. Place the PurCool Green Mini Strip against the aluminum fins of the evaporator coil and on the inside of the inner edge of the drain pan, either horizontally or vertically. As the evaporator fins begin to sweat with condensate, the PurCool Green Mini Strip will slowly dissolve treatment into the drain pan, preventing sludge, odors, and overflows. PurCool Green Mini Strips are sized to treat up to 5 tons and can be cut in half to treat multiple smaller evaporators.
