NP48PC MICROMET®

6R Micromet® Cartridge

For Eliminating Lime Scale Formation, Removing Objectionable Tastes and Odors and Filtering Sediment Down to 10 Microns

Will treat up to 135 gallons of water (1200 lbs. of ice) per day for six months.

Directions for Installing/Replacing Cartridges:

Turn off the water supply to the NP24DD unit. Press the red pressure relief button and unscrew bowl counter clockwise. Discard old cartridge. The "O" ring in the housing should be inspected and lubricated as necessary. Remove outside wrapper from the new cartridge and install in bowl.

After installation, filter should be flushed with sufficient water to remove any traces of fines. Under normal circumstances, treatment will last for up to six months. Date this canister upon installation and replace it in six months.

This filter should not be used where the water is microbiologically unsafe or with water of unknown quality without adequate disinfection before and/or after the system.
